Glen Erickson  
Manager of Advertising Programs  
707 Wilshire Boulevard, Suite 2075  
Los Angeles, California 90017

Mr. Erickson:

Thank you for your letter alerting us to the content of a recent episode of Nip/Tuck. Like you and the Parents Television Council, we were surprised and offended at the specific language as well as the overall message of the program. We certainly do not wish to support offensive programming.

Our commercial aired on the show as part of a larger advertising package that we purchased which included multiple cable channels and programming. We are not always able to screen the entire programming list or content of each show within the package when we commit to them several months in advance. However, your letter is making us take a much closer look at our future media choices, and **we certainly will suspend all advertising support of that program.**

Thank you for being so vigilant in monitoring what our children are watching on television. It is only through diligent efforts from people and groups like yours that we can be completely aware of what is truly happening in the world.

Sincerely,

Robert Devaux  
General Manager
